Published according
to the Decision of Academic
North-Caucasus Federal University

Reviewers:

Sergey Babenishev – Professor of Mechanical Engineering
and Technological Equipment Department at North Caucasus Federal University, Dr.Eng.,
Vladimir Samoylenko – Associate Professor of Automatic, Electronic Engineering,
and Metrology Department at Stavropol State Agrarian University, PhD

Engineering Drawing: textbook / authors: Andrey Bratsikhin, Maria Shpak, Sergey Krassa. – Stavropol: Publisher NCFU, 2015. – 104 p.

Брацихин А. А., Шпак М. А., Красса С. И.

Инженерная графика: учебное пособие (курс лекций). – Ставрополь: Изд-во СКФУ, 2015. – 104 с.

ISBN 978-5-9296-0768-4

Textbook is generated according to the requirements of Federal State Standard for Higher Education for Bachelor's Degree students.

Established on meeting of Mechanical Engineering and Technological Equipment Department (Minute №3 at the 30th of March, 2015) for students taught the program 21.03.01 - Oil and Gas Engineering, and 08.03.01 – Civil Engineering.

TABLE OF CONTENTS

1. BASIC RULES OF MAKING DRAWING.....	5
1.1. Introduction	5
1.2. Drawing equipment and tools	6
1.3. Lettering	12
1.4. Lines on drawing	14
1.5. Scales	16
Questions	17
2. SECTIONS AND OTHER CONVENTIONS	18
2.1. Introduction	18
2.2. Hatching of the section areas	18
2.3. Section view	20
2.4. Sections	24
2.5. Views of the object	26
2.6. Making an inclined section view or section	28
2.7. Removed Elements on a Larger Scale	30
2.8. Additional requirements	31
Questions	33
3. CONVENTIONAL REPRESENTATION OF THE OBJECT'S ELEMENTS	35
3.1. Introduction	35
3.2. Threaded elements	35
3.3. Representation of Springs on Technical Drawings	38
3.4. Conventional representation of gears on technical drawings	40
3.5. Conventional representation of splined connection on technical drawings	43
Questions	45
4. DIMENSIONING ON TECHNICAL DRAWING	46
4.1. Introduction	46
4.2. General principles	46
4.3. Methods of dimensioning	49
4.4. Indication dimension values on drawing	53
4.5. Radius, diameter and square dimensioning	56
4.6. Special indication	59
4.7. Indication of levels	63
Questions	63
5. INDICATION OF TOLERANCES ON TECHNICAL DRAWING	65
5.1. Introduction	65
5.2. Indication of the tolerance and fit	66
Questions	70
6. INDICATION OF SURFACE ROUGHNESS ON TECHNICAL DRAWING	71
6.1. Introduction	71
6.2. Indication of surface roughness	71
Questions	75
7. INDICATION OF GEOMETRICAL TOLERANCE ON TECHNICAL DRAWING	76
7.1. Introduction	76
7.2. Indication of the geometrical tolerances	77
7.3. Indication of datum on technical drawing	79
Questions	81

8. REPRESENTATION OF WELDS ON TECHNICAL DRAWING	82
8.1. Introduction	82
8.2. Indication of the welds	83
Questions	88
9. AXONOMETRIC PROJECTIONS	89
9.1. Introduction	89
9.2. Isometric projection	89
9.3. Diametric projection	90
9.4. Oblique frontal diametric projection	91
9.5. Hatching of the axonometric projections	92
Questions	93
10. BLENDING OF LINES AND CURVES	94
GLOSSARY	100
LIST OF REFERENCE LINKS	102
