Ситдикова Роза Иосифовна, доктор юридических наук, профессор, профессор кафедры предпринимательского и энергетического права юридического факультета Казанского (Приволжского) федерального университета.

Г34 Генетические технологии и медицина: доктрина, законодательство, практика : монография / отв. ред. А. А. Мохов, О. В. Сушкова. — Москва : Проспект, 2021.—360 с.

ISBN 978-5-392-34837-4

В настоящем издании исследуются комплекс достижений в области геномики, которые содействуют разработке более эффективных, персонализированных подходов к профилактике и лечению инфекционных и неинфекционных заболеваний. Технологии генетического секвенирования помогают понять, как геномные факторы человека и патогенов (и их взаимодействия) способствуют индивидуальным различиям в иммунологических ответах на лекарственную терапию. Такое понимание способно повлиять на будущую политику и процедуры управления в отрасли здравоохранения, профилактику и лечение заболеваний. Реализация новой политики в значительной мере зависит от правовой доктрины и законодательства, ориентированного на решение практических проблем технологического развития.

Законодательство приведено по состоянию на 1 февраля 2021 г.

Книга рассчитана на широкий круг читателей, так как носит междисциплинарный и межотраслевой характер. Монография может быть рекомендована преподавателям, ученым, практическим работникам, всем, кто интересуется проблемами технологического развития страны.

Издание подготовлено в рамках государственного задания Министерства науки и высшего образования Российской Федерации «Правовое регулирование ускоренного развития генетических технологий: научно-методическое обеспечение» (№ 730000Ф.99.1.БВ16АА02001), а также реализуемых авторами представленных материалов НИРов, финансируемых Российской фондом фундаментальных исследований (РФФИ).

При работе над монографией использованы материалы СПС «КонсультантПлюс».

Статьи представлены в авторской редакции.

Научное издание

Мохов Александр Анатольевич, Сушкова Ольга Викторовна и др.

Reviewers:

Sychev Dmitry Alekseevich, Doctor of Medical Sciences, Professor, Corresponding Member of the Russian Academy of Sciences, Rector of the Russian Medical Academy of Continuing Professional Education (RMACPE) of the Ministry of Health of Russia;

Sitdikova Roza Iosifovna, Doctor of Law, Professor, Professor of the Department of Business and Energy Law, Faculty of Law, Kazan (Volga Region) Federal University.

Genetic Technologies and Medicine: Doctrine, Legislation, Practice : Monograph / resp. eds A. A. Mokhov, O. V. Sushkova. — Moscow : Prospekt, 2021. — 360 p.

ISBN 978-5-392-34837-4

This publication explores a set of advances in genomics that are driving the development of more effective, personalized approaches to the prevention and treatment of noncommunicable as well as infectious diseases. Genetic sequencing technologies contribute to our understanding of how human and pathogen genomic factors (and their interactions) contribute to individual differences in immunological responses to drug therapy. This understanding has the potential to influence future policy and management procedures in the health sector, prevention and treatment of diseases. The implementation of the new policy depends to a large extent on legal doctrine and legislation focused on solving practical problems of technological development.

Legislation provided as of February 1, 2021.

The book is intended for a wide range of readers, as it is interdisciplinary and interdisciplinary in nature. The monograph can be recommended to teachers, scientists, practitioners, everyone who is interested in the problems of the country's technological development.

The publication was prepared within the framework of the state assignment of the Ministry of Science and Higher Education of the Russian Federation “Legal regulation of the accelerated development of genetic technologies: scientific and methodological support” (No. 730000F.99.1.BV16AA02001), as well as research projects implemented by the authors of the submitted materials, funded by the Russian Foundation for Basic Research (RFBR).

When working on the monograph, the materials of the ATP “ConsultantPlus” were used.

Articles provided in the author’s edition.

CONTENT

| | |
|--|-----|
| Authors | 9 |
| Introduction | 13 |
| Chapter 1. General provisions on genetic technologies in medicine | 17 |
| § 1. <i>Borodin S.S., Kryukova E.S.</i> Legal regulation of stimulating the introduction of genetic technologies into economic circulation | 18 |
| § 2. <i>Kartskhia A.A.</i> Genetic technologies in a transition to a the “new normal” under COVID-19 pandemic | 25 |
| § 3. <i>Knyshoid M.Z.</i> Legal support of information security of the genetic information database in the Russian Federation | 34 |
| § 4. <i>Kolokolov A.V., Bakashvili Sh.B., Brikman A.A.</i> Legal regulation of innovative genetic technologies in medicine | 45 |
| § 5. <i>Mokhov A.A.</i> Genetic technologies as a driver of management and other technologies aimed at the health of the younger generation | 64 |
| § 6. <i>Posulikhina N.S.</i> Legal regimes for the accelerated development of genetic technologies in medicine: concept, types, principles of construction | 73 |
| § 7. <i>Rassolov I.M., Chubukova S.G.</i> Problems of legal regulation of genetic testing | 90 |
| § 8. <i>Ruzanova V.D., Povarov Yu.S., Belyakov V.I.</i> The problems of human genetic data using in personalized medicine | 101 |
| § 9. <i>Sushkova O.V.</i> Assessment of the benefits and risks of protecting exclusive rights to the results of genetic technologies in DNA | 111 |
| § 10. <i>Tiras Kh.P.</i> Biobanks in the context of science, technology and education | 123 |

| | |
|--|------------|
| Chapter 2. Ethics and genetic technologies in medicine | 138 |
| § 1. <i>Levushkin A.N.</i> Civil status of patients in the use of genetic technologies and biomedical services | 138 |
| § 2. <i>Mokhov A.A.</i> Ethics of high technologies in medicine | 152 |
| § 3. <i>Pekshev A.V.</i> Problems of ethical perception by society and the state of medical genetic technologies | 161 |
| § 4. <i>Siluyanova I.V.</i> Ethical significance and prospects of legal regulation of medical biotechnology | 165 |
| § 5. <i>Soboleva M.E.</i> Ethical aspects of genome editing and human cloning | 171 |
| § 6. <i>Sushkova O.V.</i> Pharmacogenetics and pharmacogenomics: ethical, social and legal implications | 178 |
| § 7. <i>Chaplenko A.A., Khokhlov A.L.</i> Ethics and genetic technologies in medicine: genome editing of human embryo | 193 |
| Chapter 3. Problems of legal regulation of genetic technologies (development, implementation, application in medical practice) and protection of rights citizens in connection with the application of genetic technologies in medicine | 200 |
| § 1. <i>Vypkhanova G.V.</i> Legal regulation of monitoring the impact of GMOs on humans and the environment | 201 |
| § 2. <i>Zhavoronkova N.G.</i> State policy and strategizing in the field of GMO production and turnover | 216 |
| § 3. <i>Kapitonova E.A.</i> Restriction of a woman's right to abortion on genetic grounds as a means of protecting the unborn child's right to life | 225 |
| § 4. <i>Korobko K.I.</i> Legal regulation of the activity of population biobanks in the Russian Federation: current state and areas of improvement | 236 |
| § 5. <i>Orekhov S.N., Yavorsky A.N.</i> Synthetic biology as a risk factor for the biosafety system | 244 |
| § 6. <i>Pozdeev A.R., Ivanova I.L.</i> Legal regulation of assistance to patients with rare diseases: on the example of spinal muscular atrophy | 263 |
| § 7. <i>Romanovsky G.B., Romanovskaya O.V., Ryzhova A.A.</i> Human rights and prenatal genetic diagnosis | 270 |
| § 8. <i>Tyurin E.A., Chekan L.V., Khramov M.V.</i> Compliance with biological safety requirements when conducting research with recombinant DNA molecules | 280 |

| | |
|---|------------|
| Chapter 4. Legal regulation of genetic technologies in foreign countries | 295 |
| § 1. <i>Agafonov V.B.</i> Legal regulation of labeling of food products containing components obtained with the use of genetically engineered organisms in the Russian Federation and in foreign countries | 296 |
| § 2. <i>Grushin Yu.O.</i> Regulation of genetic technologies in the Republic of India | 301 |
| § 3. <i>Demidenko A.A.</i> Genetic technologies: the experience of Israel | 313 |
| § 4. <i>Minbaleev A.V.</i> Institute for consent to the processing of genetic information in Australia | 322 |
| § 5. <i>Pestrikova A.A.</i> Legal and ethical problems of human genetic editing in foreign legal order | 331 |
| § 6. <i>Chaplenko A.A., Yavorsky A.N.</i> Legal regulation of the use of genetic technologies in medicine in foreign countries | 339 |
| § 7. <i>Shipova E.A.</i> Development of genetic technologies (and support measures) in medical clusters: foreign experience | 347 |
