FOREWORD

At the meeting of the American Iron and Steel Institute held in New York in May, 1912, the members indicated a desire for two general meetings of the Institute each year. Accordingly the Board of Directors decided to have one such meeting annually in May in New York, and another in October in some iron and steel producing center to be designated.

Under this plan the October meeting of 1912 was held in Pittsburgh.

The immediate publication of the proceedings of each meeting is made through the press, especially through the trade papers of the iron and steel industry. The official publication of the proceedings of the meetings of each year is made in the form of a book known as the Year-Book of the American Iron and Steel Institute.

JAMES T. McCLEARY,
Secretary.

NEW YORK, *January, 1913.*

TABLE OF CONTENTS

MAY MEETING.
