Mental disorders in epilepsy. M., Prometheus publishing house, 398 p.

The monograph shows the opportunity to study the pathogenesis of mental disorders in epilepsy based on the characteristics of its flow using clinical methods, structural dynamic, epidemiological and statistical analysis. Structural and dynamic analysis of the major clinical manifestations of the disease (features of personality changes, paroxysmal disorders, psychotic symptoms, dementia) held in accordance with the main patterns of development of the disease, its types and stages. On the basis of the multi-axial classification of epilepsy was developed a model that allows in a retrospective analysis of anamnestic data and clinical assessment to establish clinical and social criteria for prognosis prediction.

CONTENTS

Preface	5
Introduction.....	7
Chapter 1. The evolution of the views on the importance of mental disorders in epilepsy for clinical and social prognosis ...	10
Chapter 2. Epidemiology of mental disorders of epilepsy	32
Chapter 3. Etiology and the pathogenesis	60
Chapter 4. Clinic of mental disorders of epilepsy.....	102
4.1. Place of nonpsychotic mental disorders in the clinical picture of epilepsy.....	106
4.2. The clinico-pathopsychological criteria of structure and dynamics of epileptic dementia	112
4.3. Structure and dynamics of mental disorders in patients with transitory form of epileptic psychosis	130
4.3.1. Transitory psychoses with the predominantly affective disorders.....	131
4.3.2. Transitory psychoses with the predominantly delusional disorders.....	135
4.3.3. Transitory psychoses with the predominantly catatonic disorders.....	137
4.3.4. Structure and the duration of remissions	141
4.4. Structure and dynamics of mental disorders in patients with schubweise form of the epileptic psychosis	144
4.4.1. Affective psychoses	147
4.4.2. Affective-delusional psychoses.....	148
4.4.3. Delusional psychoses.....	152
4.4.4. Affective-delusional psychoses with catatonic inclusions	155
4.4.5. Catatono-delusional psychoses	156
4.4.6. Catatonic psychoses.....	157
4.4.7. Structure and duration of remissions	158

4.5. Structure and dynamics of mental disorders in patients with chronic flow of epileptic psychosis..	162
4.5.1. Affective-delusional syndromes with over-valuable delusion	165
4.5.2. Affective-delusional syndromes with a tendency for systematization of delusions	168
4.5.3. Affective-delusional syndromes with the hallucinatory disorders	169
4.5.4. Affective-delusional syndromes with the catatonic disorders.....	171
4.5.5. Catatonic syndromes with the affective-delusional inclusions	173
4.5.6. Structure of the personal changes	175
Chapter 5. Differential diagnosis	178
Glossary of mental disorders in epilepsy	197
Criteria of the diagnosis	207
Chapter 6. Possibilities of the combined therapy	228
Chapter 7. Clinical and psycho-social criteria for prognosis	257
Chapter 8. Prevention and organization of medical, psychological and social support of patients with epilepsy	320
Conclusion	351
References	366
