Kalayjan — master student of the Kuban State Technological University.

**Abstract.** Small business in the emerging market economy, as a special "development institution", generates positive general economic effects, expressed firstly in supporting the market (protecting property rights, developing market infrastructure, promoting "transparency" of the market and the state), and secondly, the addition of the market (the ability to change the behavior of enterprises, the development of investment incentives). At the same time, the business community consists of people with diverse personalities, personal qualities and values. The philosophy of business in all its own: from maintaining moral principles and norms of behavior, to profit by any means from the point of view of law and morality. Karl Marx noted this as follows: "Provide capital 10% profit, and capital agrees to any application, at 20% it becomes brisk, at 50% is ready to break his head, at 100% he tramples all human laws, at 300% There is no such crime that he would not venture to risk, even if he was afraid of the gallows." In the article, small business is considered from the point of view of difficult legal and economic conditions, financial and economic activity, which is forced in the sector of the shadow economy.

**Key words:** business, small business, shadow activities, shadow operations, the level of corruption, deviant behavior, economic relations
