CONTENTS

CHAPTER I 4

Introductory; individuality of Smith; nature of the work done by him; he will be remembered only as an economist.

CHAPTER II..... 7

Born at Kirkcaldy, June 5, 1723; his father and mother; his early life; goes to Glasgow University at fourteen years of age; afterwards gains a Snell Exhibition and goes to Oxford; his experience there; goes to Edinburgh in 1748 and lectures on Belles Lettres under patronage of Lord Kames; friendship with Hume; elected to chair of Logic in Glasgow in 1751, and to chair of Moral Philosophy four years later; descriptions of him by Professor Millar and Alexander Carlyle; anecdote of his absent-mindedness; the Poker Club and the Select Society; candidature of Hume and Burke for chair of Logic at Glasgow; publication of "Theory of Moral Sentiments" in 1759; letter from Hume on its appearance; Smith engages himself to travel with the Duke of Buccleuch in Europe; in 1763 they go to Paris; letter to Hume from that city; the duke and Smith go to Toulouse and return to Paris; Turgot and Quesnay; Smith returns to Kirkcaldy and spends ten years in writing "The Wealth of Nations"; publishes this work in 1776; Hume's letter of congratulation; Hume endeavours to get Smith to act as his literary executor; Smith's letter on Hume's death in 1776; reception of "Wealth of Nations"; anecdote of Pitt; Smith goes to London; supposed encounter with Johnson; returns to Edinburgh, 1778; his life there, and his appointment as Commissioner of Customs; letter to him from the Bishop of Norwich on Hume's death; Smith's manner of composition; elected Lord Rector of

Glasgow in 1787; death in 1790.

CHAPTER III. 36

Smith as a moralist; his style; his apparent reluctance to be thought a sceptic; his consequent failure to establish his ethical system on a philosophical basis; his predecessors in philosophy; Locke; Berkeley and the "New Question"; Hume's further application of the experimental method; Smith adopts Hume's method; sympathy his fundamental principle; neither Smith nor Hume utilitarians; "merit and demerit"; conscience; the character of virtue; works on other subjects; "Considerations concerning the First Formation of Languages"; "Principles which lead and direct Philosophical Enquiries as illustrated by the History of the Ancient Physics", and by the "History of Ancient Logic and Metaphysics"; "Nature of that Imitation which takes place in what are called the Imitative Arts"; Essay on the external senses; "English and Italian verses"; Smith apparently contemplated a great work on the theories of ethics, and of jurisprudence.

CHAPTER IV. 49

Pitt; cites Smith in House of Commons on tendency of capital to accumulate; Smith's influence on Pitt; the concrete character of "The Wealth of Nations"; political economy before Smith; nature of great fallacies; mercantile system; its origin and true meaning; the arguments of the merchants; comparison between Colbert and Bismarck; the exaggeration of the free traders, and the fallacies of the protectionists; France and the encyclopædists; the agricultural system; Quesnay and Turgot; nature of advances accomplished by men of genius; difference between science and literature in this respect; Hume prepared the ground for Smith; Quesnay's influence on Smith; abstract nature of method of English economists who succeeded Smith; difference between political economy and politics; they were not separated in

Smith's hands; his mixed method illustrated by his defence of the Navigation Acts; arrangement of "Wealth of Nations"; account of its contents.

CHAPTER V..... 102

Relation of Smith's teaching to modern politics; the concrete character of his method; political economy a hypothetical science; Smith an individualist but only as a rule of practice; his attitude towards Free Trade the only safe one in view of the impending controversy; limits of State interference; Smith's bias against enlarging the duties of the Government when persons under no disability were concerned; hardly any political problem can be treated as a single illustration of a simple principle; the House of Commons not fitted to decide what are really speculative questions; there is no theoretical but only a practical test possible as regards the propriety of State interference, and this appears to have been Smith's view; the pressure exercised by popular constituencies; the faults of the two great parties; the outlook for the future.
