EDITOR'S PREFACE.

THIS volume of the Catalogue of Greek Coins in the British Museum contains the money of Crete and of the Islands of the Aegean to which the ancient Geographers applied the names of Cyclades and Sporades.

The metal of each coin is stated, and its size in inches and tenths, and the weight of the gold and silver coins is given in English grains. Tables for converting grains into grammes and inches into millimètres, as well as into the measures of Mionnet's scale, are placed at the end of the volume.

The work has been written by Mr. Warwick Wroth, of the Department of Coins; and I have carefully revised it, comparing every coin with the corresponding description.

REGINALD STUART POOLE.
