ADVERTISEMENT.

The ports, coasts, and islands described in this volume were visited by the *Gettysburg*, except the African coast and ports between Dernah and Alexandria. This part of the work was compiled chiefly from British Admiralty charts Nos. 244 and 374, and from information derived from Greek spongers and smugglers who frequent that region.

The views on plates 1, 2, 4, 5, 6, 7, 13, 24, 26, 27, are from sketches made by H. A. Johnson, U. S. N.; that on plate 3 is from a French chart; those on plates 8, 9, 10, 28, 29, 30, 31, 33, 34, 35, 36, are from British charts, No. 34 being originally from a French chart; plates 11, 12, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25 were struck from the Italian Hydrographic Office plates through the kindness of Captain Magnaghi, of the Italian Navy, who loaned them for the purpose.

U. S. HYDROGRAPHIC OFFICE,
Washington, D. C., January 27, 1879.

NOTICE.

All bearings are *true* except when otherwise stated.

The direction of the wind is the point from which it blows; that of the current the point to which it is setting.

Distances are expressed in nautical miles and cables. The cable is assumed to be equal to 100 fathoms.

Longitudes are from the meridian of Greenwich.

Lights are of natural color unless otherwise stated.
