## PREFACE.

---

PSYCHOLOGY is the science of mind,—mind in whatever manifested. Its applications are numerous,—in biology, sociology, criminology, education,—and each application is rapidly becoming a specialty.

It is with psychology in education that this book is concerned. But although it is intended mainly and primarily for teachers, it is hoped that others whose business it is to educate the human mind, and to influence its growth, may find something herein that will serve them also. If the book aids in quickening an interest in mind study as applied to education, in the narrower or in the broader sense, its chief purpose will be accomplished.
